Raven: Four Questions for the Next Decision

Protect30A | MAJ26-000007 | Community meeting brief | REVIEW COPY

Community REQUEST: Enter answers and supporting documents into the public record before the next relevant decision. This is a community request, not an asserted legal prerequisite.

Meeting status: October 7, 2026 TRC agenda item 4 requested approval; staff recommended approval with conditions. Final approval and the next Raven hearing are not independently confirmed. No meeting date or deadline is advertised. If approved, direct these questions to remaining permits, condition verification and enforcement.

1. Who provides water/sewer, and what capacity is committed?

Reconcile the staff water-provider table (packet p. 3 / staff p. 2) with utility plan p. 34 / sheet 11. Both preserved pages were visually rechecked. A mismatch does not prove inadequate service.

Records / responsibility: County Planning, utilities and DEP: signed phase-specific commitments, connection/ownership drawings, reservations, peak demand and network capacity.

Resolution: Providers reconciled; commitments and capacity basis documented.

2. Which adopted stormwater requirements govern Raven?

Packet p. 3 lists a 25-year event. AO02 testimony (PDF pp. 13-14), AO04 p. 1 and AO11 pp. 2-3 are not substitutes for adopted controlling text.

Records / responsibility: County Planning / permitting agencies: operative DRI order, incorporated exhibits, amendments and parcel/phase applicability.

Resolution: Dated adoption chain linked to engineering and permit compliance.

3. What project-specific evidence shows no worsening of flooding/pollution?

Staff reports proposed storage and favorable floodplain findings (packet pp. 6-7); environmental review reports no observed onsite contamination (p. 8). AO01 p. 1 reports inspected pond compliance, not blanket Raven clearance.

Records / responsibility: County reviewers, permit agencies and utilities: native model/inputs, outfall mapping, accepted as-builts, maintenance and incident/monitoring records.

Resolution: Reproducible analysis; measurable safeguards, owners and corrective triggers.

4. Which enforceable recreation/open-space commitments must be preserved?

Reconcile narrative pp. 15-16 with allocation pp. 77-78. AO09 majority/concurrence boundary is PDF p. 18; remand does not invalidate all approvals. Open space alone does not establish a public recreation right.

Records / responsibility: County Planning / recorded instruments: operative conditions, Exhibit E, parcel ledger, easements, amendments and later orders.

Resolution: Protected acreage/rights reconciled; authorized changes and safeguards documented.

Six-request tracker: RAV-01 County; RAV-02 DEP water; RAV-03 DEP wastewater; RAV-04 NWFWMD; RAV-05 South Walton Utility; RAV-06 Regional Utilities. Sent verified October 16, about 12:20-12:23 p.m. CDT. Acknowledgment, records received and substantive answers are unverified; no verified response is under review. All four questions remain unresolved. Sent is not delivery or an answer.

October 7 TRC, 31:28-32:55: A committee member asks about litigation and continued building; the response describes no injunction at that time and distinguishes amendment litigation. Supplied transcript derivative; audio and speaker identity not independently verified. This is not current legal status. Watch: youtube.com/watch?v=9yvkdF9r6AU&t=1888s

Sources: County packet 540083 (page references above); October 7 agenda 540121; AO historical source summaries. General county virtual-comment rules require 24-hour registration and exclude quasi-judicial virtual comment. Verify the specific notice, forum, submission route and cutoff before participating.

Prepared October 16, 2026, 1:36 p.m. CDT | ChatGPT for Doug Liles | v1.0 review | Cited records and official agenda/procedure checks. Personal community advocacy; no current violation, contamination, dangerous leak or unlawful recreation loss established.
